Tech for good Workshop

ImaginCafé

Celsa Díaz Ai Instructor at allWomen

Workshop Content

- I. One solution for each type of problem
- II. Use cases
- III. Build your first interactive visualization

I. One solution for each problem

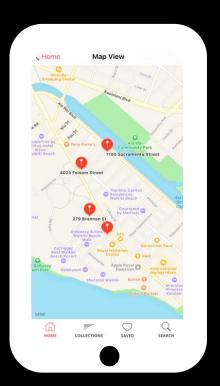

Interactive Visualization

- Denounce social injustice
- Engage citizens in social problems
- Open knowledge to the society

Event Geolocation

- Support social initiatives by geolocating them
- Denounce events
- Find areas of interest for minorities

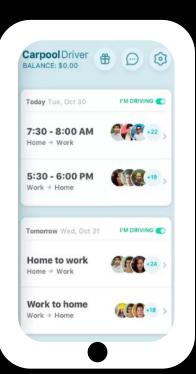

Coordination Platform

- Coordinate small producers for complete services
- Coordinate collective decision making
- Food-cops cooperation
- Liquid democracy tools

Sharing Platform

- Share resources to decrease the ecological footprint
- Share goods to reduce consumption

Forecasting Tool

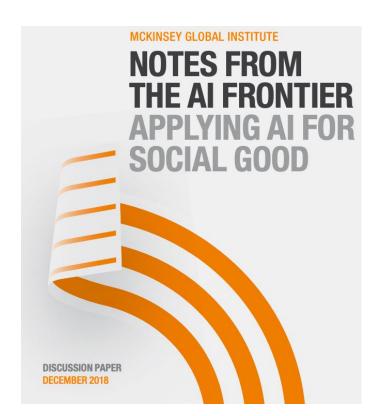

- Track a behavior and help users to predict future events
- Help planning and trigger changes on habbits

Ai Assistant

- Cross barriers for people with limitations
- Reader & Translator assistance

Mapping usage frequency of AI capabilities to ten social impact domains identifies patterns of the relevance and applicability of AI for social good.

Usage frequency of analytics capability for each domain

Analytics, eg, optimization, network analysis ower

Usage frequency of AI capability for each domain Domain Equality and Health and Info verification Economic inclusion and validation Environment hunger empowerment Security and Public and Capability ▼ Education justice Crisis response social sector Infrastructure Deep learning on structured data Natural language processing² Image and video classification Object detection and localization Language understanding Sound detection and recognition Sentiment analysis Language translation Face detection Tracking Emotion recognition Person identification Optical character and handwriting recognition Speech-to-text Content generation Reinforcement learning Near-duplicate or similar detection

II. Use Cases

Sexual Misconduct Tracker

Sexual Misconduct Tracker

Empathize

Problem **Definition**

Ideate Solution

Build **Prototype**

Test

societal blaming

further abuse

Fear

family ties

embarrassment

shame

isolation

reliving the experience

manipulation

Who will believe me? humiliation

workplace retaliation

financial dependence
